

Availability of SID Data Elements by State in 1998-2004

In 1998, the HCUP Central Distributor databases, including the SID, were reconstructed into the following files:

Core	Contains the data elements that are provided by most state Data Organizations which can be uniformly coded across states, and state-specific data elements that are available from a few state Data Organizations and usually retain state-specific coding.
Charges	Contains data elements related to detailed charges information.
AHA Linkage	Contains hospital identifiers used by the data sources, the AHA, and by HCUP.

Because the Data Organizations decide which elements may be released on the HCUP Central Distributor databases, not all data elements will be available for all States.

In the 1995-1997 SID, a different placement of data elements in files was in effect; for a description of those files, see **Availability of SID Data Elements by State in 1995-1997** (on the SID Documentation CD-ROM).

The availability of data elements and their location within the different file types (e.g., Core, AHA Linkage, etc.) varies across years and states. Specific information is available in the following documents:

- **Availability of SID Data Elements by State in 1990-1994** (on the SID Documentation CD-ROM)
- **Availability of SID Data Elements by State in 1995-1997** (on the SID Documentation CD-ROM)
- **Availability of SID Data Elements by State in 1998-2004** (this document)

The following table (page 2) shows for the 1998-2004 files:

- the location of each data element within the different SID files, and
- the availability of data elements across the individual states.

The first column specifies the data element. The next three columns identify the three types of SID files. The remaining columns refer to the states using the state postal code (e.g., AZ for Arizona, CO for Colorado). Cells marked with an "x" indicate that the data element is available for that file or state. Blank cells indicate that the data element is not available for that file or state. Not all HCUP data elements are available for all states. For information on how the HCUP data elements are defined, refer to the **Description of SID Data Elements** (on the SID Documentation CD-ROM).

When multiple data elements of the same type are available, the number of data elements available is specified in the state cell. For example, the state cell for diagnoses (i.e., DXn) identifies the number of available diagnoses. CO has 15 diagnoses: 1 principal diagnosis and 14 secondary diagnoses. Not all diagnoses are coded on all records.

(1) **File Structure:** In the Michigan, Nebraska and South Carolina SID, all available variables are included in the Core file. There are no Charges or AHA linkage files for these 3 states. The detailed charges (CHGn) provided by Nebraska and South Carolina are included in their Core files.

(2) **Access to the California SID:** The Office of Statewide Health Planning and Development (OSHPD) in California now requires an IRB review by the Committee for the Protection of Human Subjects (CPHS) and an evaluation by the Internal Review Committee at OSHPD before CA SID files may be provided to applicants. Applicants must submit OSHPD-specific forms and provide project information including purpose, project overview, data security, and reasons for requesting specific data elements. Applications must be sent directly to OSHPD and the entire process may take 3 months or more for approval. For more information, please contact the HCUP Central Distributor.
